

Marine Power Reinvented.

When you're out on the water, you need power you can trust. Our lithium-ion systems deliver safe, quiet, dependable power.

Built for Safety

- **IP66 Rated:** Water-resistant and built for real marine conditions.
- **UL1973 Certified:** Ensures the safe, reliable operation of your entire power system in modern applications
- **ABYC E-13 Compliant:** Meets the latest safety standards for lithium-ion battery systems in boats.

Made for the Water's Roughest Days

Our aircraft-grade aluminum enclosures protect your battery from extreme temperatures, impact, and punctures — strength you won't get from plastic cases that can crack under stress.

Enclosure can withstand 22,000 lb crush test and 150G impact test

Passed rigorous tests against vibration, shock, puncture, and more

Fire and toxic vapor-resistant for ultimate safety and reliability

Quiet, Clean Power

Skip the fumes, noise, and generator hassles. Enjoy smooth, silent energy whether you're cruising, anchoring, or overnighting.

Smart Protection with Every System

Our NeverDie® Battery Management System works in the background to keep you safe. The internal shutdown technology automatically disconnects power in extreme conditions, preventing overcurrent and thermal runaway, to keep you safe on the water.

Premium Power, Trusted Performance

Chosen and trusted by leading brands like Chris Craft and Nordhavn for dependable, high-performance power.
