

NCC/SBC Charger Accessories

Accessories

These charger accessories are designed to support NCC1500, NCC2500, SBC1500, and SBC2500 Series Chargers in demanding mobile and off-grid applications. From remote LED indicators to weather-sealed CANbus connectors and AC cords, each component is built for durability and dependable performance. Whether enabling efficient charging, reliable data transmission, improved visibility, or added protection, these accessories ensure optimal system performance.

NCC CHARGER ACCESSORIES

Note: Each NCC1500 and NCC2500 unit includes mating AC and DC connector kits for customer integration. Pre-made harnesses can be provided upon request and are listed below.

PART	DESCRIPTION
Weatherpack CANbus Extension, M to F, 6 ft #75-111W-72	This 6-foot Weatherpack CANbus extension cable is designed for reliable data transmission in rugged environments. With male-to-female sealed connectors and a durable thermoplastic jacket, it's ideal for extending CANbus communication lines in automotive, marine, and off-road applications.
	
Remote Charger LED Indicator #20-160-NCC	This remote LED indicator provides clear visual feedback on charger or battery status, making it easy to monitor charging progress from a distance. It signals charge level with flashing red (<80%), yellow (>80%), or green (100%). Additionally, it indicates when charging has stopped or a fault is present.
	
Dual Female Connector Weatherpack Assembly 20-18 AWG, Mating Charger CANbus Connector #80-283	This dual female Weatherpack connector is designed for 20-18 AWG wire commonly used in CANbus charger systems. It provides a sealed, weather-tight connection that resists moisture, dust, vibration, and extreme temperatures, ensuring reliable performance.
	Note: Component is provided as an unassembled connector part for configurations that require it
Charger AC Cord 120V, 5FT #75-112	This accessory is built for safe, efficient charging. Its durable construction and standard 120V rating ensure reliable power delivery, while the 5-foot length offers flexibility for a range of installation needs.
	

SBC CHARGER ACCESSORIES

Note: Each SBC1500 and SBC2500 unit includes mating AC and DC connector kits for customer integration. Pre-made harnesses can be provided upon request and are listed below.

PART	DESCRIPTION
Charger AC Cord 120V, 5FT #75-112	This accessory is built for safe, efficient charging. Its durable construction and standard 120V rating ensure reliable power delivery, while the 5-foot length offers flexibility for a range of installation needs.
	
DC Charger Harness, 6AWG, SB50 Grey Connector to 3/8" Ring Terminals, 6ft Length #75-232G-72	This charger harness provides the electrical connection between the charger's DC output and the system DC bus bars.
